• Full-Stack Software Developer •

## SUMMARY

Innovative software developer offering experience in full-stack software development. Known for excellent troubleshooting skills, ability to analyze code and work through issues swiftly. Fast learner that is always eager to tackle new challenges.

## EXPERIENCE

### Software Development Student || CodeWorks || February 2021 - May 2021

- 520+ hours of full-stack software developing experience.
- Practiced partner coding while building full-stack applications.

#### Kanban

- Full-stack application that helps you organize daily projects by boards, tasks, & lists.
- Technologies: Vue.js front-end, node.js back-end, MongoDB, Auth0
- Responsible for both front-end and back-end code.

#### 710

- Full-stack application that allows the user to record maintenance and keep a history of records for their vehicles.
- Technologies: Vue.js front-end, node.js back-end, MongoDB, Auth0
- Responsible for both front-end and back-end code, worked within a team of five other developers.

### Truck Broker || Dawn Transportation Inc. || August 2019 - February 2021

- Typed up confirmations for trucks to deliver nursery stock around the country.
- Ensured confirmations were delivered to companies on time and to the trucks in a timely manner.

### Teacher's Assistant || Bend Elementary School || December 2018 - June 2019

- Assisted Kindergarten class of 25 students with daily reading and math lessons.
- Helped students one-on-one with reading comprehension.
- Arrived to the school early and solely ran the morning before-school program which included ~30 students (K-8th grade).

### Photographer / Framer || Studio 530 Photography & Custom Framing || June 2012 - June 2019

- Photographed numerous school/sports photos, 1000+ students.
- Assembled photographs with their custom-made frames for 200+ customers.
- Handled data entry for school photos for 1000+ students.
- Used Photoshop to enhance portraiture photos.
